SECTION 2. TRACKING

2.1 Symbols

The following are the only symbols used for the purposes indicated below:

- C - Change in Regulation
- D - Delete or Discontinue
- I - Change Resulting In An Increase to A Customer's Bill
- L - Material Relocated In the Tariff
- N - New Rate or Regulation
- R - Change Resulting In A Reduction to A Customer's Bill
- T - Change In Text or Regulation But No Change In Rate or Charge

2.2 Tariff Format

2.2.1 Sheet Numbering - Sheet numbers appear in the upper left corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

2.2.2 Sheet Revision Numbers - Revision numbers also appear in the upper left corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect.

2.2 Tariff Format (Cont'd)

2.2.3 Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

2.2.4 Check Sheets - When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the Commission.

SECTION 4. RATE SCHEDULE

4.1 Description of Services

Carrier provides interexchange telecommunications services, services that are available on either a switched or dedicated access basis. Calls are rated based on the duration of the call. Unless otherwise indicated, rates are identified in this tariff as per minute rates.

4.2 Calculation of Usage Rates

Billing for calls placed over Carrier's network is based in part on the duration of the call. Billing is in six second, eighteen second or minute increments, with a minimum call length of not less than six seconds. Timing begins when the called station is answered, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch. A call is terminated when either party (called or calling) hangs up. Upon request of the Subscriber, credit will be provided for uncompleted calls/wrong numbers.
