IDAHO TELECOMMUNICATIONS PRICE LIST

APPLICATION OF PRICE LIST

This price list contains the service description and rates generally applicable to the intrastate telecommunications service furnished by Brittan Communications International Corporation ("hereinafter referred to as the Company or BCI").

PRICE LIST FORMAT

1. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the price list. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
2. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the check sheet for the sheet currently in effect.
3. **Check Sheets** - When a price list filing is made with the Idaho Public Utilities Commission, an updated check sheet accompanies the Price List filing. The check sheet lists the sheets contained in the price list, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*).

SECTION 3 - EXPLANATION OF RATES3.1 Timing of Calls

The Customer's long distance usage charge is based on call duration, without regard to time of day, day of week or distance called. Calls are timed by the underlying carrier, whose services are resold by the Company in accordance with its own price list.

- (i) On all calls, chargeable time begins when connection is established between the calling station and the called station.
- (ii) Chargeable time ends when the calling station "hangs up." If the called station "hangs up" but the calling station does not, chargeable time ends when the connection is released by the automatic timing equipment in the network.
- (iii) When the Company's services are directly connected to a Customer-provided communications system at the Customer's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer provided communications system.

3.2 Calculation of Rates and Charges

Rates for the Company's intrastate services are usage sensitive but do not vary according to distance called or the time of day or day of week. No special holiday rates apply. Calls are billed in full minute increments. The usage rate is based on an initial period of one minute, plus any additional period. Additional periods are billed in one minute increments.
