1. APPLICATION AND REFERENCE

1.1 APPLICATION OF PRICE LIST

(T)

This Price List contains the regulations, terms, and conditions and charges applicable to intrastate exchange and network services and equipment furnished by Frontier Communications of America, Inc., hereinafter referred to as the Company.

(T)

(T)

A. Territory Served, Service Rendered, Rates and Rules and Regulations

The Company renders exchange telephone service, toll telephone service and private line services and channels throughout the territory served by it and its connecting companies as shown in its schedules, which include a description of the service furnished. The Company concurs with the maps filed by US West.

B. Notice of Filing

The procedure which will be followed by the Company in rendering service is shown in General Regulations - Conditions of Offering in this Price List.

(T)

No officer, employee or agent of the Company has any authority to waive, alter or amend in any respect these rates or general regulations, or any part of, or to make any agreements inconsistent with the information shown in the filed Price Lists.

(T)

The rates, and general regulations shown are subject at all times to addition, change or abolition after proceedings duly held by the Idaho Public Utilities Commission. Changes in the rates, and General Regulations shown in the Price Lists must first be approved or accepted by the Idaho Public Utilities Commission.

(T)

C. Effective Dates

1. For services established prior to the effective date shown in the Price List, the effective date will be as shown in the Price List. (T)
2. For all new service or equipment furnished on or after the effective date shown in the Price List, the effective date will be the day following the day connected. This will include changes of address involving changes in billing periods. (T)
3. For all service on which a change of type, class or grade of service is completed on or after the effective date shown in the Price List, the effective date will be the day following the day changed. (T)
4. For exceptions to the effective dates, see individual sections.

Continued

1. APPLICATION AND REFERENCE

1.2 AVAILABILITY OF SERVICE

Provision of service under this Price List is subject to the availability, on a continuing basis, of the required plant and facilities, and is limited to the capacity of the Company's plant and facilities, as well as plant and facilities the Company may obtain from other carriers. Service will be furnished at the discretion of the Company, based on technical, operational, and economic factors.

(T)

1.3 PRICES FOR SERVICES NOT LISTED IN THIS PRICE LIST

The Company will endeavor to provide services requested by customers which are not included in this Price List, depending on equipment and facilities availability and economic considerations. Pricing for these services will be accomplished on an Individual Case Basis (ICB) or a customer-specific contract. The rates so developed will be available to other customers on a non-discriminatory basis.

(T)

(T)

1.4 MAPS

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.1 DEFINITIONS

For the purpose of these Price List schedules the terms and expressions listed below shall have the meanings set forth opposite them. (T)

ACCESS LINE - Telephone service involving outside plant facilities, which enables the customer to initiate and receive telephone calls. (See Network Access Lines.)

ACOUSTICAL CONNECTION - A connecting arrangement without electrical connections that permits transmission of sound between utility-provided telephone instrument and customer-provided equipment.

ACTUAL COST - Actual cost refers to the cost of materials plus the rate per hour at the utility's construction labor rate.

ADDITIONAL LISTING - Any listing of a name or other authorized information in connection with a customer's telephone number in addition to that to which he is entitled in connection with his regular service.

AIR LINE MILE - As used in connection with air line mileage measurements in determining charges for exchange telephone service, including message unit service and message toll telephone service, means statute mile or 5,280 feet.

APPARATUS - Electrical or mechanical equipment in whole or in part provided by the utility in the provision of various services.

APPLICANT - The person making application to the utility for service.

Continued

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.1 DEFINITIONS (Cont'd)

AREA 1 - Area 1 consists of the exchanges identified in USWEST's "Northern Idaho" Exchange and Network Services Tariff.

AREA 2 - Area 2 consists of the exchanges identified in USWEST's "Southern Idaho" Exchange and Network Services Tariff.

AUTHORIZED PROTECTIVE CONNECTING MODULE (APCM) - Denotes a protective unit designed and manufactured under the control of American Telephone and Telegraph Company's quality assurance procedures, and which unit is to be incorporated in a conforming Answering Device.

AUTOMATIC DIALING - ANNOUNCING DEVICES - Any automatic terminal equipment, which incorporates:

1. (a) Storage capabilities of numbers to be called, or
(b) A random or sequential number generated that produces numbers to be called, and
(c) An ability to dial a call, and
2. Has the capabilities of working alone, or in conjunction with other equipment of disseminating a prerecorded message to the number called.

AUXILIARY LINE - An additional network access line from the same central office to the same premises as the main network access line and associated therewith.

Continued

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.1 DEFINITIONS (Cont'd)

BASE RATE AREA - A more closely built-up section of the exchange area in which the basic rates apply without outside plant facility charges.

BATTERY POWER - A source of electrical energy furnished for the operation of telephone equipment.

BILLABLE PREMISES WORK - All work requested by the customer and done by the Company on the customer's premises except to establish or reestablish network access through the Network Interface, so long as the Network Interface is located in the normal location.

BURIED WIRE OR CABLE - A wire or cable designed for use in underground construction and utilized in extending the utility's outside plant facilities.

BUSINESS SERVICE - Exchange service furnished to individuals engaged in business, firms, partnerships, corporations, agencies, shops, works, tenants of office buildings, and individuals practicing a profession or operating a business who have no offices other than their residences and where the use of service is principally or substantially of a business, professional or occupational nature. If the directory listing denotes the character of the service to be for business use, the rates for business service will apply.

CENTRAL OFFICE - A telephone utility's switching office unit by means of which one telephone station may be connected to another.

Continued

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.1 DEFINITIONS (Cont'd)

CENTRAL OFFICE CONNECTING FACILITIES - A facility furnished to another common carrier by the Company between the terminal location of the other common carrier and a point of connection on the Company's premises.

CIRCUIT - An outside plant facility used for the transmission of electrical energy in the furnishing of telephone and other communications service.

CLASS OF SERVICE - Business and residence.

COMMISSION - The regulatory body of the State of Idaho, namely the Idaho Public Service Commission.

COMMUNICATIONS SYSTEM - Channels and other facilities, which are capable, when not connected to exchange telecommunications service, of two-way communications.

COMPANY - The public utility named herein, Frontier Communications of America, Inc.

(T)
(T)

CONFORMANCE NUMBER - An identifying number assigned by the AT&T Company to a particular model of Conforming Answering Device incorporating an Authorized Protective Connecting Module when that model of device is in conformance with the provisions set forth by the AT&T Company in its Technical Reference for Conforming Answering Devices.

Continued

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.1 DEFINITIONS (Cont'd)

CONFORMING ANSWERING DEVICE - A customer-provided device which automatically answers incoming calls; transmits a prerecorded voice message or appropriate audible signal to the calling party; records a voice message from the calling party if so designed and arranged; and automatically disconnects from the line in a prearranged manner on completion of the last of the functions for which it was designed and arranged as described in this paragraph. The Conforming Answering Device may include remote interrogation and/or device function control. A Conforming Answering Device must incorporate an Authorized Protective Connecting Module and must bear a valid Conformance Number.

CONNECTING ARRANGEMENT - The equipment provided by the utility to accomplish the direct electrical connection of customer-provided equipment or facilities with the outside plant facilities of the utility.

CONTINUOUS PROPERTY - A property owned or leased by a customer where all portions may be served without crossing a public thoroughfare or the property of another. The property of a customer when divided by a public thoroughfare is considered to be continuous provided the customer furnishes, at his expense, a suitable underground or overhead outside plant facility connecting the property separated by the public thoroughfare.

2.2.1 Application for Service

A. Requirements

1. Each applicant for telephone service may be required to sign an application for the service desired, on a form provided by the utility, as a condition precedent to the initial establishment of service.
2. The application form will generally set forth the following information:
 - Date and place of application.
 - Location of premises to be served.
 - Date applicant will be ready for service.
 - Purpose for which service is to be used (business or residence).
 - Address to which bills are to be mailed or delivered.
 - Whether applicant is the owner or tenant of, or agent for, the premises.

2. GENERAL REGULATIONS - CONDITIONS OF OFFERING

2.7 EMERGENCY MEASURES IN CASE OF DISASTER

In the event of a disaster caused by enemy attack, by riot, insurrection, or other civil disaster, by fire, flood, storm, earthquake or other natural causes, the Company shall take emergency measures with its service as shall be ordered or directed by the Idaho Public Utilities Commission. In the absence of an order or direction by the Commission, the Company may take whatever emergency measures as it may within its discretion deem necessary in the public interest for the preservation of the service and maintenance of service to all essential users. In the event that emergency measures are initiated by the Company in the absence of an order or direction by the Commission, the Company shall, wherever practicable, notify the Commission in advance of the action which it proposes to take. Any action thus proposed by the Company shall be subject to review by the Commission. Should conditions make advance notification impracticable, the Company shall notify the Commission of the emergency action which it has taken as soon as possible thereafter.

As restoration becomes possible of any service which has been discontinued pursuant to any of the emergency measures taken under this regulation, the priority of such restoration shall be determined by the Company as it may, within its discretion, deem necessary in the public interest or as ordered or directed by the Idaho Public Utilities Commission.

All services furnished by the Company except those covered by the rules for Telecommunications Service Priority (TSP) will be subject to this regulation and the Company shall in no event be liable for any damage resulting from measures taken under this regulation except in the case of willful misconduct.

5.1 EXCHANGE AREAS

A. Description

1. Premium flat rate lines, basic measured lines, and trunk lines are provided within exchange boundaries. The exchange access line is provided from the Company's central office facilities to the customer's location. The central office serving the customer's location is designated by the Company. Through these exchange access lines, the customer has access to the local calling area of the exchange and to long distance calling on the Message Toll Network.
2. Local calling refers to calls placed to telephone numbers where message toll charges do not apply.
3. Exchange areas may contain a base rate and a suburban area. They are defined as follows:

Base Rate Area

The area within an exchange that contains the most compact development. The exchange boundary and the base rate area boundary may be one and the same.

Suburban Area

The area of an exchange outside the base rate area but within the exchange boundary. Suburban service is limited to four main stations per circuit. They are provided to these areas without additional mileage charges.

4. Services in this Price List are offered as regulated services to customers who subscribe to 5 or fewer lines pursuant to Title 61, Idaho Code.

3. Telephone is furnished for the use of the customer, the customer's family, and persons residing in the home, or employees or representatives. The service may also be extended to Joint Users.
4. Application of Business and Residence Rates
 - a. The application of business or residence rates to private or public telephone service is governed by the actual or obvious use made of the service by the customer. If residence service is found to be used largely or principally for business purposes, the Company will provide business service, except in cases where the customer will thereafter use the service for domestic or social requirements.
 - b. If it is found that the customer is permitting public use of service furnished for private use, the Company will provide Public, Semipublic, or Public Access Line Service. If the customer consents to the relocation of the facilities so they are inaccessible to the public or permits no further public use after attention has been called to the matter, a change will not be required. Where a change is required, no charge will be made for the relocation of the telephone instrument.

5.2.3 Local Service Options

A. Central Office Hunting Arrangements

1. Hunting Arrangements are provided in all Company central offices. This service is offered subject to the capabilities of the central office providing the hunting arrangement. This section applies to Simple and Complex Services including Key Lines, PBX Trunks, Data Lines, WATS Lines, FEX Lines and FEX Trunks.
2. Hunting arrangements are offered in two categories:
 - (a) Series Completion Service
 - (b) Multiline Hunt Service
3. The hunting arrangements available in any given central office will depend on the type of central office equipment provided.

6. The Custom Calling feature Call Forwarding will override the hunting arrangement provided.
7. If the customer converts from a Series Completion Service to Multiline Hunt Service, the nonrecurring charges for a Multiline Hunt Service apply.
8. Hunting arrangements as specified in this section do not apply to PBX trunk groups with Direct-Inward-Dialing (DID) Service.
9. Hunting arrangements will affect the operation or availability of some other optional features on the hunting lines. The features most often affected include forms of Call Forwarding, Call Waiting, Call Transfer, Speed Calling and others, depending on the service configuration.
10. Series Completion Service cannot be added to Multiline Hunt Service.

12. Series Completion Service

a. Description

Series completion permits calls to a busy telephone number to be routed to another telephone number in the same switching office. More than two numbers may be linked to form a series completion list. More than one telephone number can be routed to the same telephone number.

Series completion is a form of line hunting where a call is routed to an idle telephone number in a prearranged group when the called telephone number is busy. In no case does the hunting occur over more than 16 telephone numbers. The hunting sequence can be accomplished as follows:

(1) Number Hunting

The hunt always starts with the called telephone number and ends with the last telephone number in the prearranged group, completing the call to the first idle telephone number encountered. Unless the first telephone number in the group is called, only a portion of the group can be tested. The prearranged sequence can be either consecutive or nonconsecutive.

(2) Circular Hunting

The hunt starts with the called telephone number and proceeds in a prearranged order to test all numbers in the group. The call will be completed to the first idle line. This arrangement is accomplished by routing the last number in the group back to the first number. No additional charge applies other than the Series Completion charge per line.

(3) Line Make Busy

This feature provides a method for making lines appear busy to the serving central office. The feature is activated by operation of dedicated keys at the customer's premises, which in turn provides a busy appearance to the central office for predetermined lines or groups of lines. The line remains in the busy state until the associated key is depressed (deactivated). A line may be associated with only one key. Originating service is not affected by key operation.

The caller does not receive busy tone unless all numbers which have been hunted are found busy.

13. Multiline Hunt Service

a. Description

Multiline hunt service permits calls to a busy telephone number to be routed to other specified lines that do not require a telephone number. Hunting is done sequentially by terminal within the group. A line is associated with each terminal in the group. One begin-hunt telephone number must be assigned to the first line within a group of sequentially ordered lines that form a multiline hunt group. Telephone numbers may be assigned to other lines within a multiline hunt group and could effectively provide subgroups of lines to be hunted. Telephone numbers can be assigned to the hunting lines in any sequence.

Multiline hunting service provides a hunting sequence that attempts to complete a call to the line associated with the dialed telephone number. If the initial line is found busy, only the lines following the requested line within the hunt group are subsequently examined for an idle state. Busy tone is not sent to the caller unless all remaining lines in the hunt group list have been found busy. The call will be completed to the first idle line.

13. Multiline Hunt Service (Cont'd)

a. Description (Cont'd)

Multiline hunt groups (MHLG) can be assigned two types of telephone numbers (TNs); begin-hunt and nonhunting TNs. The begin-hunt TN has the multiline hunt feature and, when called, starts the hunting sequence associated with the hunt group. An MLHG must have at least one begin-hunt TN but can have essentially one per line in the group. Nonhunting TNs can be assigned to lines within an MLHG; these lines do not have the multiline feature. Incoming calls are terminated directly to the individual lines.

(1) Regular Hunting

Regular hunting starts when a begin-hunt telephone number is called in a multiline group. Hunting proceeds in ascending order through each subsequent terminal (line) in the group until an idle terminal is reached or the last (highest numbered) terminal in the group is reached. A preferential hunt list can be added to any terminal in a regular hunt group that has a begin-hunt telephone number. Circular hunting can be added to any regular hunt group.

(2) Circular Hunting

Circular hunting is provided optionally with regular hunting or preferential hunting groups. Circular hunting occurs in these groups as follows.

- (a) Circular hunting for regular hunting groups: When the hunt for an idle terminal (line) commences beyond the first terminal in the hunt group and finds all higher numbered terminals busy, the hunt returns to the first terminal in the group. The hunt ends with the terminal number preceding the terminal where the hunt in the group initially began.

The hunt continues in ascending order to the last terminal in the group, returns to the first terminal, and continues in ascending order ending at the terminal preceding the terminal where the circular hunt began.

This feature allows all lines within a multiline hunt group to be tested for busy regardless of the point of entry into the group before returning busy tone.

(3) Stop Hunt

The Stop Hunt feature is available to customers who have the Multiline Hunting Feature.

Stop Hunt allows the customer to stop the hunt of specific lines in an MLH group by the operation of a key, (not valid for multiline no hunting groups). When a hunt through a group of lines for an idle line is initiated, the hunt will proceed until it reaches a terminal associated with an active stop hunt key. There it stops. A customer may have more than one stop hunt key, but only the stop hunt terminal number associated with the last-operated key is effective (active). MLHG, which has regular hunt without circular hunting, and the hunt starts after the stop hunt terminal, will not be affected by the activation of a stop hunt key.

(a) Line Make-Busy

Line Make-Busy (LMB) enables a single line in a multiline group to be taken out of service by a key located at the customer's premises. At the time the key is depressed (activated), the line associated with the key is made busy. The line remains in the busy state until the associated key is depressed (deactivated). (c) Group Make-Busy

Group Make-Busy (GMB, causes all lines in a Multiline Hunt Group to appear busy to incoming calls. A. Description

DID Service provides the customer a means of sending digits from the central office to a switched services vehicle located on the customer's premises.

B. Terms and Conditions

1. DID Service is available from central offices where equipment and operating conditions permit. The service provides PBX station users the ability to receive calls from outside the PBX without the assistance of the attendant. Customers will be required to maintain an adequate number of trunks with DID Service in order to prevent network degradation.
2. In addition to the above charges and rates, appropriate nonrecurring charges are applicable to the establishment or rearrangement of trunks and stations in connection with providing DID service.
3. Trunks with DID Service are equipped for one-way inward service only and all trunks in a group serving DID station lines must be equipped for DID Service. Trunks serving non-DID station lines and trunks used for outward service from all station lines do not need to be equipped for DID Service.

DID Trunk Queuing is an arrangement whereby incoming calls that are placed to station lines within a DID system can be held in queue if all trunks between the central office (CO) switch and the customer's PBX are busy. Calls in queue will be held in their order of arrival until a trunk becomes available. Calls in queue are served on a first-in first-out basis. Calls held in queue will hear ringing until answered.

b. Optional Features associated with DID Trunk Queuing are as follows:

Delay Announcement

This option allows for incoming calls held in queue to hear a recorded announcement after a predetermined amount of time. The announcement can be accessed a maximum of four times and the customer has the option of providing their own announcement or a standardized Company announcement. Depending upon the customer's choice, ringing, silence or music will be returned after each announcement.

(4) The music on queue option requires a Voice Grade Private Line Circuit between the serving central office and a customer provided music source at the customer's premises.

(5) The customer must specify the length of time a call is held in queue before going to delay announcement. The customer must also specify the number of announcements (maximum of four) and the amount of time between announcements. Changes to these values may only be made through the issuance of a service order.

14. DID Two-Way Call Transfer is an optional DID feature which allows the user of a two-way trunk with DID Service, to transfer any incoming call to another line or trunk outside of the system and then leave the connection without disconnecting the call.

5.3.6 Automatic-Identification-of-Outward-Dialing (AIOD) Service

A. Description

The AIOD Service provides the customer a means of identifying toll charges on each station line of a switched services vehicle located on the customer's premises.

B. Terms and Conditions

1. AIOD Service is available from central offices where equipment and operating conditions and availability of facilities permit. AIOD Service provides central office equipment for identification and billing of outgoing toll calls by seven digit station numbers.
2. In addition to the above charges and rates, appropriate nonrecurring charges are applicable to the establishment or rearrangement of trunks and stations in connection with providing AIOD Service.
3. All trunks in a trunk group serving AIOD station lines must be equipped for AIOD Service. Trunks serving non-AIOD station lines and trunks used for inward service to all station lines do not need to be equipped for AIOD Service. AIOD trunks must be equipped for one-way outward service when the AIOD prefix is different than the Listed Directory Number prefix. When AIOD is requested from more than one central office, each central office shall be considered a separate service.

4. AIOD Service in connection with customer-provided switching equipment is furnished as shown in C. following. The operational characteristics of the signals from customer-provided equipment must conform to the standards set for Company-provided equipment. The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
5. AIOD Service will be available only to customers being served within the same wiring center (central office) as provides the main listed number. Inter-office AIOD Service will not be available.
6. The assignment of telephone numbers and the sequence of the numbers assigned to an AIOD Service is made at the discretion of the Company. All AIOD numbers must be within the same prefix. When the equipment configuration requires the assignment of blocks of telephone numbers, the rates and charges following are applicable for each unused number in the block of telephone numbers assigned.

Call Waiting Identification

A function that provides a tone to the party using the telephone to indicate another call is waiting on the line and allows the called party to receive information on a call that is waiting. The customer must subscribe to Caller Identification - Number and/or Name and Number. Customers changing from Call Waiting to Call Waiting Identification (N2W) will not incur a nonrecurring charge.

Caller Identification - Name and Number

Allows for the automatic delivery of a calling party's name and telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified in writing of such errors.

5.5.1 Listing Services

A. Description

This section applies to listings in the alphabetical section of telephone directories or Directory Assistance records in all exchanges. These listings provide information to identify a customer's telephone numbers. They are intended only as an aid to the use of telephone service.

B. Definitions

The following definitions refer to both business and residence service unless qualified.

Additional Listing

A listing provided in addition to the primary or main listing on a telephone service. Examples of additional listings are the name of another individual, in addition to the person listed in the main listing of a residence, dual name listing, or the name of an employee of a business, or another name by which a business is known.

Caption Listing

A listing arrangement consisting of a heading of first listing followed by other listings indented beneath it. Such listings may include, but are not limited to the following:

- Departments or divisions of a business
- Different locations, offices or branches of a business
- Second residence
- Employees or officers of a firm
- Members of a household
- Residence listing beneath a business listing when both services carry the same personal name
- Business listing indented beneath a residence listing when both services carry the same personal name

Designation

The portion of a directory listing showing an occupation, a professional or religious title or degree, military title or branch of service, affiliation with a professional organization or describing the general character of a customer's business. Words describing products are acceptable only for business listings. All designations must be acceptable to the Company.

Directory Listing

Essential information in the telephone directory or Directory Assistance records that allows telephone users to determine the telephone number of a listed customer. Each primary business service or joint user service is entitled to a listing appearance in the alphabetical and classified sections of the directory at no additional charge. The listings must appear the same way in both places.

Dual Name Listing

A single residence listing provided for two persons who may or may not share the same surname, but who share the same service, and reside at the same address.

Information Lines

Additional material included with a primary, additional or reference listing that is necessary for the proper routing of telephone traffic. The primary or additional listing consists of the name, a designation or title if appropriate, address (unless omitted) and telephone number. Any information in addition to this is considered an information line.

Non-Published Telephone Service

An arrangement at the customer's request whereby a customer's telephone number does not appear in either the telephone directory or the Directory Assistance records.

Non-Listed Telephone Service

An arrangement at the customer's request in which a customer's telephone number appears on Directory Assistance records but is omitted from the telephone directory.

Primary Listing

A listing provided without additional charge in connection with each service arrangement shown below:

Each primary station. There is one primary line in connection with two or more lines furnished on an auxiliary (hunting) basis. The group of lines will be identified only by one number in the group. That number is used for primary service or joint user service listings.

Each private branch exchange system and each PBX trunk number out of sequence and not arranged for rotary hunting.

C. Non-Published Telephone Numbers

1. A customer's assigned telephone number(s) may be omitted from the Company's directories or other Company records containing such information available to the general public, when the omission is requested by the customer.
2. Non-published information may be released to emergency service providers, to customers who subscribe to Company offerings which require the information to provide service and/or bill their clients, or, to telephone customers who are billed for calls placed to or from non-published numbers and to entities which collect for the billed services. When ordering non-published service, customers will be advised that the non-published information may be released as described herein.
3. The customer releases, indemnifies and holds harmless the Company from any and all loss, claims, demands, suits or other action or any liability whether suffered, made, instituted or asserted by the customer or by any other person, caused or claimed to have been caused, directly or indirectly by the publication of such number or the disclosure or non-disclosure of said number to any persons.

8.1 OUTSIDE PLANT FACILITIES

A. General

1. Except as otherwise provided in these rules, the Company will, at its own expense, furnish, install and maintain all facilities necessary to service applicants or customers in accordance with its lawful rates, rules and current construction standards.
2. Pole line and buried wire extensions necessary to furnish telephone service will be made by the Company in accordance with the Price List schedules, provided dedicated streets are available, or acceptable easements can be obtained without additional charge or condemnation. Outside plant facility charges are computed in accordance with the regular rates set forth in the Price List schedules and the payment of such charges gives the customer no ownership or control of the extension. (T)
3. Except as otherwise provided, the Company may permit the customer to furnish the outside plant facilities in accordance with the construction standards of the Company in lieu of outside plant facility charges, but in all such cases the ownership of the facilities shall be vested in the Company. (T)
4. Contracts for the telephone service where outside plant facilities at filed charges is necessary may be required by the Company as a condition incident to the establishment of service, for a period not to exceed three years.
5. The Company will determine the specific type of construction and route to be used in each particular case.

B. Facilities to the Property of an Applicant or Customer (Other than Service Connections)

1. In areas where the Company desires to maintain underground rather than aerial facilities for its operating convenience, the Company will, at no additional expense, construct the necessary underground facilities for service connections in accordance with its established construction standards.
2. In all other cases (including facilities within subdivisions where under agreement with tract owners or promoters, the Company has installed service by means of underground facilities), if the applicant or customer requests underground construction he will be required to pay the difference between the cost of providing underground facilities and the estimated cost of constructing equivalent aerial facilities. In lieu of all or part of such payment the applicant or customer may furnish such materials or perform such work as may be mutually agreed between the Company and the applicant or customer. Upon acceptance by the Company, ownership of any materials so furnished shall vest in the Company.

8.2 SERVICE CONNECTIONS

A. New Underground Service Connections

When applicant or customer, including subdivider or developer, either requests or is lawfully required to provide underground facilities, the Company will furnish such service under the following conditions with respect to underground service connections.

1. To property of applicant or customer, including subdivider or developer.

a. Tracts or Subdivisions

The Company will construct underground service connections without charge where right of way can, in the Company's judgment, be reasonably obtained, and where soil conditions and topography are such that trenching costs will not materially exceed the Company's average trenching costs. Where right of way or trenching costs are materially excessive, the subdivider or developer will pay the difference between that actual cost and average right of way and/or trenching costs.

b. All Other Cases

In all cases other than those referenced above, if the applicant or customer requests underground construction he will be required to pay the difference between the cost of providing an underground service connection and the

10.3 Caller Identification Blocking Options

10.3.1 Per Line Blocking

A. Description

Caller Identification Blocking - Per Line provides a permanent private indicator on a customer's line. Once blocking is established on the customer's line, the private status can be deactivated by the customer by dialing a code, *82 or 1182 on rotary phones, before each call, to change the indicator from private to public. This one call unblock allows the name and number to be sent for that one call only.

If a line is equipped with Caller Identification Blocking - Per Line, the name and number of that line will not be delivered to any subscriber of Caller Identification. Poison control centers, hospitals, medical centers and others who might use Caller Identification will not be able to identify callers with Caller Identification Blocking - Per Line who need assistance. E911 is not affected.
