2. Tracking and Numbering

The following symbols are used for the purposes indicated below:

- D- Delete or discontinue
- I- Increase in rate or charge
- M- Moved from another tariff location
- N- New
- R- Decrease in rate or charge
- T- Change in text, but no change in rate or charge or regulation
- C- Change in regulation

2.1 Check Sheets.

When a tariff (price sheet) filing is made with the IPUC, an updated Check Sheet accompanies the filing. The Check Sheet lists the sheets contained in the filing with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision.

2.2 Numbering

Sheet numbers appear in the upper left corner of each page. Sheets are numbered sequentially. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 6 and 7 would be 6.1

5. Termination of Service

The Company reserves the right to terminate services in accordance with rules found in IDAPA 31.D.3.

6. Service Offering

6.1 Calculation of Distance.
Calls are measured, based on airline distance between the rate center of the customer's terminal or switch location to the rate center of the destination of the call.

6.1.2 The distance between the rate centers of the customer's switch and destination point is calculated by using the vertical ("V") and horizontal ("H") coordinates found in AT&T Tariff FCC No. 10, in the following manner.

6.1.2.1 Formula

Step 1- Obtain the "V" and "H" coordinates for the Subscriber's switch and the destination point.

Step 2- Obtain the difference between the "V" coordinates of each of the rate centers. Obtain the difference between the "H" coordinates.

Step 3- Square the difference obtained in Step 2.

Step 4- Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5- Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher

whole number if any fraction results from the division.

Step 6- Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the rate centers.

6.2 Minimum Call Completion
Operator Service Provider Customers, Telephone Callers and Telephone Customers can expect a call completion rate of 99%.

6.3 Description of Services
The Company endeavors to provide high quality service. All network access is monitored and engineered to provide a p.01 grade of service (99% call completion ratio). Service is available 24 hours per day, 7 days a week, subject to routine maintenance and outages beyond the control of the Company. The Company's equipment is designed and engineered to provide high quality transmission of voice and data with a minimum level of impairment such as noise and echo. However, overall quality may vary somewhat due to the variability in quality of the connections provided by the local telephone companies and other interexchange carriers which is beyond the Company's control.

The service provided is an automated collect only service, offered only within correctional facilities for the exclusive use of inmates.
