**PRICE LIST FORMAT**

- A. Page Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the Price List. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the most current sheet number on file with the Commission is not always the Price List page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I.(i).
  - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a Price List filing is made with the Commission, an updated Check Sheet accompanies the Price List filing. The Check Sheet lists the sheets contained in the Price List, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages). The Price List user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

**SECTION 2 - RULES AND REGULATIONS, *cont'd.*****2.3 Payment and Credit Regulations, *cont'd.*****2.3.2 Deposits**

The Company reserves the right to examine the credit record of the Customer, using any lawful sources for determining credit standing. If the Customer's financial condition is unknown or unacceptable to the Company, the Customer may be required to provide the Company with a security deposit which the Company may apply against overdue charges. The amount of the security deposit shall be equal to three months' estimated usage but may vary with the Customer's credit history and projected usage. The Customer shall be apprized that after one year of service the Account shall be reviewed, and in the event that all amounts due have been paid within the terms and conditions of this Price List, the deposit shall be refunded in full with interest as required by law or regulations. If subsequent payment or usage patterns change, the Company may request an increase in or resubmission of the security deposit as appropriate. The Company may also require a security deposit before service is restored (along with the payment of overdue charges) from the Customer whose service has been discontinued for nonpayment of overdue charges. Such security deposit may be based on a new credit history (taking into account the discontinuance of service) and estimates of usage.

The fact that a security deposit has been made in no way relieves the Customer from the prompt payment of bills upon presentation.

**2.3.3 Advance Payments**

For Customers whom the Company determines an advance payment is necessary, the Company reserves the right to collect an amount not to exceed one (1) month's estimated charges as an advance payment for service. This will be applied against the next month's charges and a new advance payment may be collected for the next month.

**SECTION 2 - RULES AND REGULATIONS, *cont'd.*****2.4 Taxes and Fees, *cont'd.*****2.4.3 *cont'd.*****A. Pay Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. The Pay Telephone Surcharge, which is in addition to standard Price Listed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

**SECTION 2 - RULES AND REGULATIONS, *cont'd.*****2.5 Refunds or Credits for Service Outages or Deficiencies****2.5.1 Interruption of Service**

Credit allowances for interruptions of service which are not due to the Company's testing or adjusting, to the negligence of the Customer, or to the failure of channels, equipment or communications systems provided by the Customer, are subject to the general liability provisions set forth in Section 2.6 herein. No credit is issued for outages less than ½ hour in duration. Credit for outages greater than ½ hour in duration is issued for fixed recurring monthly charges only. Outage credits are calculated in thirty minute intervals. The amount of the credit is determined by prorating the monthly recurring charge for the time of the outage (in thirty-minute intervals). It shall be the obligation of the Customer to notify the Company immediately of any interruption in service for which a credit allowance is desired by Customer. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any, furnished by the Customer and connected to the Company's terminal. Interruptions caused by Customer-provided or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using the long distance network via local exchange company access.

Credit allowances for interruptions of service billed on a usage basis shall be limited to the rate applicable to the initial period of the call to compensate for re-establishment of the connection.

If objection in writing is not received by Company within a reasonable period of time after bill is rendered (as determined by current law and regulatory policy), the account shall be deemed correct and binding upon the Customer.

**SECTION 3 - RATES AND SERVICES, *cont'd.*****3.2 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Price List No. 4.

- Step 1 - Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.
- Step 2 - Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.
- Step 3 - Square the differences obtained in Step 2.
- Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

**3.8 Legends Debit (Prepaid) Card Service**

Legends Debit (Prepaid) Card Service allows Customers to place direct dialed calls between locations within the State of Idaho. Customers access the Company's network by dialing a toll-free number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance on the Customer's account on a real time basis as the call progresses.

Customers purchase a Debit Card which assigns each Customer a Debit Account, provides each Customer with a Personal Account Code and lists instructions for accessing and using Company's service. Debit Cards are available in varying denominations. Purchase of a Debit Card entitles the Customer to use the Company's network for a number of minutes equivalent to the card denomination divided by the effective per minute rate. The Customer's right to utilize network usage within a given Debit Account associated with that Debit Account number. No minimum service period applies.

Payment for Retail Debit Cards and Available Usage in a Customer's Debit Account is non-refundable. Retail Debit Card service rates are not distance or time of day sensitive in nature. Holiday discounts do not apply.

Network usage for Debit Card Calls is deducted from the Available Usage Balance in Customer's Debit Account in full unit increments. For debiting purposes, the minimum call usage is one (1) unit.

**4.3 Busy Line Verification and Interrupt**

Busy Line Verification and Interrupt services are offered in areas where the service may be obtained from the local exchange carrier.

With Busy Line Verification (BLV), the Legends operator will contact the LEC operator to determine if the called number or line is in use. Only one BLV will be made per telephone call and an associated charge will apply whether or not conversation was detected on the line. The operator will not complete the call for the Customer initiating the verification request.

Busy Line Interrupt (BLI) allows the Legends operator to contact a LEC operator to interrupt a telephone conversation in progress, upon the caller's request and after a Busy Line Verification occurs. Upon the caller's request, the Legends operator will contact the LEC operator, who will interrupt the busy line and inform the called party that there is a call waiting from the caller. The LEC operator will not complete the call, but will only inform the called party of the request. If the call is released the Legends operator will offer to complete the call for the Customer initiating the interrupt request. An applicable service charge and applicable per minute charges will apply to the completed call. Only one BLI attempt will be made per telephone call and a charge will apply whether or not the called party releases the line.
